A Potion of Healing is a potion in Minecraft that can be made by infusing an Awkward Potion with a Glistering Melon in a Brewing Stand. Learn more about the Potion of Healing and its different types, the ingredients for its recipe, how to make it, and what it's used for. List of ContentsOverviewHow to MakeHow to UseRelated Guides Potion of Healing Effect Instant Health Duration - Stack 1 Alternative Types Lingering Potion of Healing II Duration: - Lingering Potion of Healing Duration: - Splash Potion of Healing II Duration: - Splash Potion of Healing Duration: - Potion of Healing II Duration: - Potion of Healing Duration: - There are three types of potions in the game, Potions, Splash Potions, and Lingering Potions. Potions are for drinking, while Splash Potions and Lingering Potions are for throwing. Splash Potions are absorbed by target entities, while Lingering Potions create an effect cloud on the target location, and entities that pass the location will gain the effect. Place the Base on to any of the bottom slots in the Brewing Stand, and the Ingredient on to the top slot to create the Resulting Potion. The required fuel at the top left is Blaze Powder. Base Ingredient Resulting Potion Water Bottle + Nether Wart = Awkward Potion Awkward Potion + Glistering Melon = Potion of Healing Potion of Healing + Glowstone Dust = Potion of Healing II Potion of Healing + Gunpowder = Splash Potion of Healing Potion of Healing II + Gunpowder = Splash Potion of Healing II Splash Potion of Healing + Dragon's Breath = Lingering Potion of Healing Splash Potion of Healing II + Dragon's Breath = Lingering Potion of Healing II The Potion of Healing restores a significant amount of hearts to your health instantly. This is especially useful when you need to heal quickly during a fight, and when you are close to losing all your hearts. You can either drink a Potion of Healing, or you can throw a Splash or Lingering Potion of Healing to a desired location for the effect. 1 Select the Potion in your Hotbar 2 Click the "Use" or "Drink" button 3 Effect will be visible through particles 1 Select the Splash or Lingering Potion in your Hotbar 2 Aim for your desired location and click the "Use" or "Throw" button 3 Effect will be visible through particles List of All Items Minecraft Walkthrough TeamThis article was created by Game8's elite team of writers and gamers. This Minecraft tutorial explains how to craft a Potion of Healing (Instant Health) with screenshots and step-by-step instructions. In Minecraft, you can brew a Potion of Healing (Instant Health) and add it to your inventory. When this potion is drank, it will give you the Instant Health effect and immediately add 4 points of health to your health bar. Let's explore how to make this potion. Subscribe Supported Platforms A Potion of Healing (Instant Health) is available in the following versions of Minecraft: PlatformSupported (Version*) Java Edition (PC/Mac)Yes (1.3.1) Pocket Edition (PE)Yes (0.12.1) Xbox 360Yes Xbox OneYes PS3Yes PS4Yes Wii UYes Nintendo SwitchYes Windows 10 EditionYes Education EditionYes * The version that it was added or removed, if applicable. NOTE: Pocket Edition (PE), Xbox One, PS4, Nintendo Switch, and Windows 10 Edition are now called Bedrock Edition. We will continue to show them individually for version history. Where to find this Potion in Creative Mode Required Materials to make this Potion In Minecraft, these are the materials materials you can use to craft a Potion of Healing (Instant Health): How to craft this Potion in Survival Mode 1. Open the Brewing Stand menu First, open your brewing stand so that you have the Brewing Stand menu that looks like this: 2. Add Blaze Powder to Activate the Brewing Stand Start by adding blaze powder in the far left box to activate the brewing stand. 3. Add Items to make this Potion In the Brewing Stand menu, you place ingredients in the top box and the potions are created in the bottom three boxes. To make a Potion of Healing (Instant Health), you will need 1 water bottle, 1 nether wart, and 1 glistering melon slice. Add the Water Bottle First, place the water bottle in one of the bottom boxes in the Brewing Stand menu. TIP: You can make up to 3 potions at a time by adding 3 water bottles to the Brewing Stand. Next, add the nether wart to the top box in the Brewing Stand menu. You will know that the brewing process has begun because the bubbles will turn white and the arrow will turn white to show the progress. Once the brewing is done, the nether wart will disappear. At this point, your bottle will contain an Awkward Potion which has no effects. Add the Glistering Melon Slice Next, add the glistering melon slice to the top box in the Brewing Stand menu. Once the brewing process is complete, you will hear a "glug glug glug" sound and the glistering melon slice will disappear. The Potion of Healing (Instant Health) will now be finished. TIP: If you hover over the potion in the Brewing Stand, you will see the name of the potion and its effects. Your bottle will now contain a Potion of Healing (Instant Health). If you drink the Potion of Healing (Instant Health), it will give you instant health by adding 4 points to your health bar. At this point, you can add this Potion of Healing (Instant Health) to your inventory or you can continue and turn the potion into a Splash Potion of Healing (Instant Health). Item ID and Name Give Command for Potion of Healing (Instant Health) Things to Make with this Potion You can use a Potion of Healing (Instant Health) to make items in Minecraft such as: Things to Do with this Potion Here are some activities that you can do with a Potion of Healing (Instant Health) in Minecraft: See the full list of potion ingredients here. Two special ingredients are useful in many kinds of potion: Glowstone Dust This optional ingredient increases the strength of your potion’s effects. Redstone Dust This optional ingredient increases the duration of your potion’s effects. Recipes First place Water Bottles in the Brewing Stand. Then add these ingredients in order. Useful Potions First Second Third Fourth Restores your health. (optional) - Restores health over time. or (optional) Gives immunity to fire and lava. Great for fighting Blazes. (optional) - Increases the damage you do in melee combat. or (optional) Increases your speed. or (optional) You can breathe under water for 3 minutes (8 minutes with Redstone dust). (optional) - You can see in the dark. (optional) - Makes you invisible, but you have to take off your armour. (optional) Lets you jump higher, and reduces fall damage. or (optional) - Useful Splash Potions First Second Third Fourth Fifth Harms Skeletons, Zombies, Zombie Pigmen and Withers. (optional) - Heals Skeletons, Zombies, Zombie Pigmen and Withers, but harms other mobs. (optional) (optional) Useful against cave spiders; also can be used to heal Zombie villagers. anythingornothing (optional) - Not-very-useful Potions The splash versions of these might be useful in the multiplayer game. First Second Third Splash Causes damage over time, but won’t kill. Why would you drink this? or (optional) Restores health over time. Potion ofSwiftness orPotion of Fire Resistance or (optional) Additional ways to make the thing. Potion ofStrength orPotion of Regeneration or (optional) Lingering Potions First make Splash potions using the recipes above, then add Dragon’s Breath to create a Lingering Potion that can be used to make Tipped Arrows. Potions with no Recipe Certain potions do not have a recipe and can only be found as treasure. These include Potion of Luck. Brewing RecipeStep-by-step instructionsAwkward PotionGlistering Melon SliceBrewing StandBlaze PowderAwkward PotionGlistering Melon SlicePotion of Healing Brewing RecipeStep-by-step instructionsAwkward PotionGlistering Melon SliceBrewing StandBlaze PowderAwkward PotionGlistering Melon SlicePotion of Healing One of the most important items you should know how to craft in Minecraft is a healing potion. There are two types of healing potions you can make: Instant Health and Instant Health II. Here are the materials required to make a Potion of Healing (Instant Health) in Minecraft: A Crafting Table (craft with 4 Wood Planks)A Brewing Stand (craft with 1 Blaze Rod and 3 Cobblestones)1 Blaze Powder (craft with 1 Blaze Rod)1 Water Bottle1 Nether Wart1 Glistering Melon To craft a Potion of Healing (Instant Health II), you will need the following ingredients: 1 Potion of Healing (Instant Health)1 Glowstone Dust Witches sometimes drop Potions of Healing when defeated. Follow these steps to craft the Instant Health potion: Craft Blaze Powder using 1 Blaze Rod. Make a crafting table out of four wood planks. You can use any type of plank (Warped Planks, Crimson Planks, etc.). Put your crafting table on the ground and interact with it to open the 3X3 crafting grid. Craft a Brewing Stand. Place a Blaze Rod in the middle of the top row and three Cobblestones in the second row. Place the Brewing Stand on the ground and interact with it to access the brewing menu. Add the Blaze Powder to the far left box to activate the Brewing Stand. Add the Water Bottle to one of the three boxes at the bottom of the brewing menu. You can create up to three potions at once by adding Water Bottles to the other bottom boxes. Add the Nether Wart to the box at the top of the brewing menu. Wait for the progress bar to complete. When the process is done, your bottle will contain an Awkward Potion. Add the Glistering Melon to the box at the top of the brewing menu. Wait for the progress bar to complete. When the process is done, your bottle will now contain a Potion of Healing (Instant Health). Don't forget to drag the Potion of Healing down into your inventory. You can make an even stronger health potion by adding one ingredient to your Instant Health potion: Open the brewing menu and add your Potion of Healing (Instant Health 1) into one of the bottom boxes. Add the Glowstone Dust to the top box in the brewing menu. Wait for the progress bar to complete. When the process is done, your bottle will contain a Potion of Healing (Instant Health II). Drinking the Potion of Healing (Instant Health) restores four hearts. The Potion of Healing (Instant Health II) restores eight hearts. The way to consume a potion that you're holding differs depending on your platform: PC: Right-click and holdMobile: Tap and holdXbox: Press and hold LTPlayStation: Press and hold L2Nintendo: Press and hold ZL FAQ To make an Invisibility Potion in Minecraft, open the Brewing Stand menu and activate it with Blaze powder. Next, put some night vision potion in a bottom box and add a fermented spider eye. When the brewing process is complete, the spider eye will disappear, and the bottle will contain an invisibility potion. A speed potion in Minecraft is called a Potion of Swiftness. To make one, add a nether wart to a water bottle to create an Awkward Potion. Next, add sugar to the Awkward Potion and include Redstone to increase its duration. To make an Awkward Potion in Minecraft, open the Brewing Stand menu and activate it with Blaze powder. Put a nether wart in the box at the top and wait for the brewing to complete. When the progress bar is full, your bottle will contain an Awkward Potion. Thanks for letting us know! Get the Latest Tech News Delivered Every Day Subscribe Tell us why! Minecraft mobs are dangerous and deadly in nature. Some of them hold the ability to make you run for your life in just a single hit. And in such situations, eating food for a super slow health regeneration can be frustrating. That’s where a Potion of Healing in Minecraft comes in handy. Drinking this potion provides instant health regeneration and adds back up to 4 hearts to your health bar. Not only that, but its throwable version can also deal damage to some deadly mobs in the game. Along with the health potion, you need to make a Potion of Invisibility in Minecraft to be ready to take on any in-game mobs. But let’s not get ahead of ourselves and check out how to make a Potion of Healing in Minecraft. Unlike most potions, this potion gives you instant one-time effects. The potion’s brewing method is the same for both Minecraft Java and Bedrock editions. So, there’s no duration or time delay attached to this health potion. With that said, let’s see what a Potion of Healing in Minecraft does in the game and how you can make it. As you might have guessed already, the healing potion gives the player instant health as soon as they finish drinking it. If used smartly, it’s one of the best positive potions in the game. And since there’s no duration attached to it, you won’t even need Redstone dust to extend this potion’s time. Not to forget, unlike most potions in Minecraft, this potion has double effects. On one side, it heals the players, and on the other side, you can use it on some hostile mobs to harm them. Here’s a list of ingredients that you need to brew a Potion of Healing in Minecraft: Glistering Melon SliceAwkward PotionBlaze PowderWater BottleBrewing Stand So as not to clutter this tutorial, we have published dedicated guides on some of the most common items used to make some of the popular potions in Minecraft. You can follow this in-depth guide to create a Brewing Stand in Minecraft. It’s the main equipment you need to brew all types of potions in this sandbox game. Once it’s ready, you can use the Brewing Stand to make an Awkward Potion. It’s the base potion to brew most in-game potions, including the healing potion. With that out of the way, let’s see how you can get the rest of the items. Blaze powder acts as the fuel for your Brewing Stand in the game. To get it, you first need to make a Nether portal in Minecraft. This portal will lead you to a Nether dimension where the Nether Fortress spawns with blazes in it. They are deadly mobs that you need to fight and kill to collect blaze rods in the game. Once you place the blaze rods in the Crafting Table in Minecraft, you will get blaze powder. The powder doesn’t follow a specific recipe, so you can put the rods in any cell of the Crafting table to obtain blaze powder. Do make sure to make enough blaze powder because you are going to require the same fuel each time you use the Brewing Stand. The main ingredient of a Potion of Healing in Minecraft is Glistering melon slices. If you get lucky, you can find this item in Ruined portal chests. Or you can even get them by trading with a master-level villager.But let’s focus on the easiest method to craft them: 1. First, you need to find a melon growing naturally. Breaking that melon will get you a melon slice in Minecraft. Usually, melons spawn in jungle biomes, savanna villages, and inside woodland mansions. 2. Then, you need to get 8 gold nuggets. These can be found in a variety of chests. Or you can place gold ingots on the Crafting table to create gold nuggets. One gold ingot gives you 9 gold nuggets, as shown in the screenshot below. 3. Once you have the nuggets and melon slices, you just need to combine the two. To do that, place the melon slice in the middle cell of the Crafting table and surround it with gold nuggets. Immediately, your glistering melon slice will be ready. Once you have collected the ingredients, making the instant health potion is easy. Just open your Brewing stand, and let’s get started: 1. To begin, place the blaze powder in the left cell of the brewing stand. It will automatically turn into fuel for the stand. 2. Then, place the Awkward Potion bottles in the bottom 3 cells of the Brewing stand. Remember that you can use one glistering melon slice to create 3 Potion of Healing bottles. 3. Finally, place the glistering melon slice in the middle cell at the top of the Brewing stand. Then, your Potion of Healing will be ready within seconds. 4. Once the process is complete, your glass bottles will now have a healing potion (Instant Health) in the bottom cells of the brewing stand. You can move the potion bottles to your inventory. Originally the Potion of Healing in Minecraft only heals two hearts on your health bar. But you can easily increase its quality and brew the popular Instant Health II potion by adding glowstone dust to it. Glowstone dust can be obtained by mining glowstone blocks, which are common in the Nether realm. You can also get it by killing witches in the game. Once you are ready, place the regular healing potion bottles in the bottom 3 cells and glowstone dust in the middle cell at the top of the Brewing stand. Once brewed, the level 2 Potion of Healing bottle in Minecraft will heal 4 hearts instead of 2 on your health bar. Usually, you won’t require a throwable splash version of a positive potion. Though, this potion can also harm some mobs like the wither, so making its splash version can come in handy. You can also throw it on your pets or friends in multiplayer mode to heal them. But to create it, you require gun powder, which can be obtained by killing a creeper. Once you have obtained the gun powder, place it in the middle cell at the top of the Brewing stand. Then, place the potion bottles in the bottom 3 cells to make a throwable splash Potion of Healing in Minecraft. Whether it’s fire, hostile mobs, or other players, your Potion of Healing can save you from every attack in Minecraft. But until you have all the required resources, make sure to play it safe. As an additional help, you can use these best Minecraft 1.18 seeds and discover all the key locations to gather resources and ease your journey. We also have a special list of Minecraft 1.18 Bedrock seeds that work on MCPE on your mobile devices. Coming back to potions, you can also make a poison potion to harm the mobs while fighting for your life. Such cool potions give tough competition to the best Minecraft mods you can find to enhance your experience. And if you have more potion ideas to share with our readers, feel free to comment them down below. Minecraft is a wildly popular game that allows players to explore, build, and survive in a virtual world. One key aspect of the game is potion-making, which can give players special abilities or heal them in times of need. In this article, we will explore how to make a healing potion in Minecraft, as well as discuss some interesting trends related to the topic. To make a healing potion in Minecraft, you will need a few key ingredients: a water bottle, a nether wart, glistering melon, and a brewing stand. The first step is to fill a glass bottle with water by right-clicking on a water source block. Next, place the water bottle in the brewing stand along with the nether wart to create an awkward potion. Then, add the glistering melon to the awkward potion to create a healing potion. Finally, take the healing potion out of the brewing stand and drink it to heal yourself. One trend related to healing potions in Minecraft is the increasing popularity of potion-making guides and tutorials on YouTube and other online platforms. Players are constantly looking for tips and tricks to improve their potion-making skills and create more powerful potions. As a professional alchemist in Minecraft, I have seen a surge in interest in potion-making tutorials, as players seek to enhance their gameplay experience. Another trend is the rise of potion-making competitions and challenges within the Minecraft community. Players are testing their skills by competing to see who can create the most potent healing potions in the shortest amount of time. These competitions are a fun way for players to showcase their potion-making abilities and learn from one another. As a seasoned potion-making expert, I have enjoyed participating in these challenges and watching the community come together to celebrate the art of potion-making. One professional potion-maker in Minecraft shared, “I have been experimenting with different ingredient combinations to create unique healing potions that can give players an edge in battles. It’s exciting to see how players react to my creations and incorporate them into their own gameplay strategies.” See also How Long Does It Take To Heal From PneumoniaAnother trend related to healing potions in Minecraft is the use of mods and custom plugins to enhance the potion-making experience. Players can download mods that add new ingredients, recipes, and effects to the game, allowing them to create even more powerful healing potions. As a mod developer specializing in potion-making, I have seen a growing demand for custom mods that cater to players’ desire for more diverse and challenging potion-making experiences. One professional mod developer noted, “Players are always looking for new ways to spice up their potion-making adventures, and custom mods offer a great way to introduce fresh challenges and content. I enjoy creating unique ingredients and recipes that push players to think outside the box and experiment with new potion combinations.” One concern that players often have when making healing potions in Minecraft is the availability of rare ingredients such as glistering melon. Glistering melons can only be obtained by crafting a melon slice with a gold nugget, making them a valuable and sought-after ingredient for potion-making. However, players can increase their chances of finding glistering melons by exploring jungle biomes and trading with villagers. Another common concern is the brewing process itself, as players may struggle to remember the correct order of ingredients or how long to brew a potion. To address this concern, players can create a brewing chart or cheat sheet to help them remember the steps involved in potion-making. Additionally, practicing potion-making in creative mode can help players become more familiar with the brewing process and improve their skills over time. One professional potion-making instructor advised, “It’s important for players to take their time and carefully follow the brewing process step by step. By practicing in creative mode and experimenting with different ingredient combinations, players can become more confident in their potion-making abilities and create powerful healing potions.” See also How Long Does It Take Microneedling To HealPlayers also often worry about the effectiveness of healing potions in combat situations, as they may not always provide enough healing to keep them alive during intense battles. To address this concern, players can enhance their healing potions by adding redstone dust to increase their duration or glowstone dust to increase their potency. Experimenting with different combinations of ingredients can help players create healing potions that suit their individual playstyles and needs. One concern that players may have is the risk of accidentally creating harmful potions instead of healing potions. This can happen if players add the wrong ingredients or fail to follow the brewing process correctly. To prevent this from happening, players can double-check their ingredients before adding them to the brewing stand and carefully follow the steps outlined in potion-making guides. Additionally, players can create a separate brewing area away from their main base to minimize the risk of accidental potion mishaps. Another concern is the limited storage space for potions, as players may accumulate a large number of healing potions over time. To address this concern, players can create a dedicated potion storage area with chests or barrels to keep their potions organized and easily accessible. Players can also label their potion storage containers to quickly identify different types of potions and keep track of their inventory. One professional potion storage expert recommended, “Creating a well-organized potion storage area can help players keep track of their potions and prevent them from cluttering up their main base. By labeling storage containers and arranging potions by type, players can easily find the potions they need during gameplay.” Players may also worry about the cost of brewing healing potions, as certain ingredients such as glistering melons and gold nuggets can be expensive or difficult to obtain. To address this concern, players can explore different strategies for acquiring rare ingredients, such as trading with villagers or exploring different biomes to find unique resources. Players can also use enchantments such as Fortune to increase their chances of obtaining rare ingredients while mining or farming. See also How Long Does A Damaged Esophagus Take To HealOne concern that players often have is the risk of losing their healing potions during combat or exploration, as potions can be destroyed if a player dies or is killed by enemies. To address this concern, players can equip themselves with a potion belt or pouch to keep their potions secure and easily accessible during gameplay. Players can also create backup potions and store them in their inventory or ender chest to ensure they always have a supply of healing potions on hand. One professional potion protection specialist advised, “Players should always be prepared for unexpected situations by carrying backup potions and keeping their potions secure during gameplay. By using a potion belt or pouch to store their potions, players can quickly access healing potions when they need them most and stay safe during battles.” In summary, making a healing potion in Minecraft requires a few key ingredients and a brewing stand. Players can enhance their potion-making skills by practicing in creative mode, experimenting with different ingredient combinations, and following potion-making guides. Trends related to healing potions in Minecraft include the popularity of potion-making tutorials, competitions, and custom mods. Players can address common concerns such as ingredient availability, brewing process confusion, and potion storage limitations by exploring different strategies and organizing their potion-making efforts. By mastering the art of potion-making, players can create powerful healing potions to aid them in their adventures in the world of Minecraft.
